

CARLOPHILLIPS

Screen Inventory Review Workbook

Desktop + mobile mock reference, specification workspace, and exception-state appendix

HOW TO USE THIS WORKBOOK

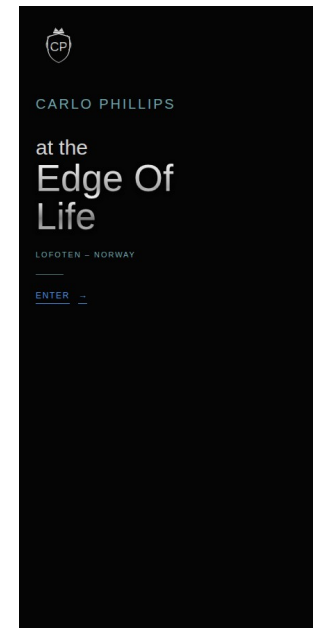

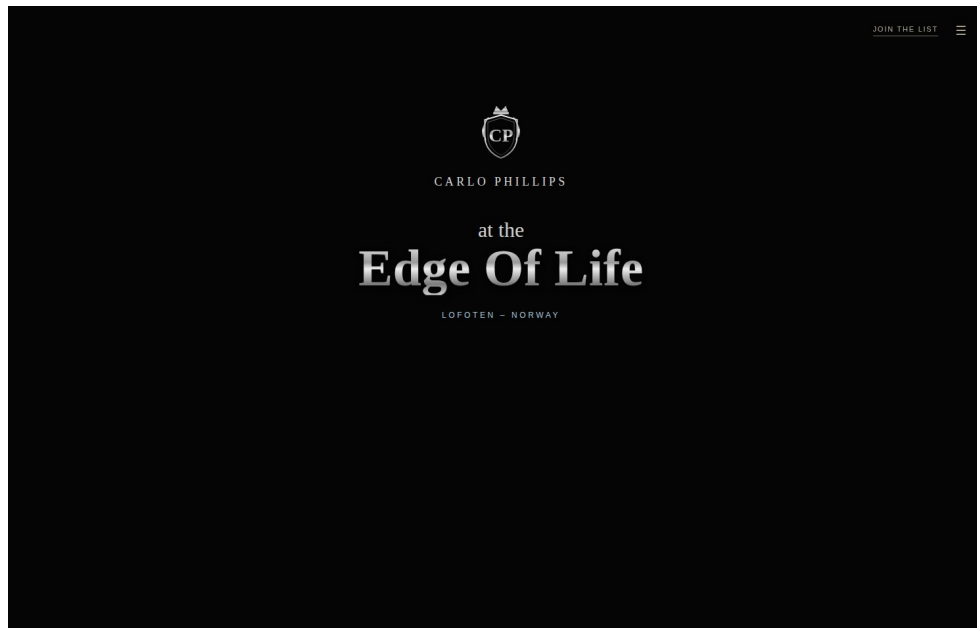

1. Review the larger desktop and mobile mock pair.
2. Record the intended trigger, requirements, and acceptance criteria in the writable panel.
3. Use the appendix to define exception states before implementation.

INDEX Screen Flow

01 Landing — Pre-Morph	02 Landing — Post-Morph	03 Discovery — Default [Video Stage]
04 Discovery — Default, Order CTA Active	05 Discovery — Overlay Gallery	06 Discovery — Overlay Gallery, Order CTA Active
07 Discovery — All Categories Grid	08 Discovery — Product Grid (All Hoodies)	09 Cart — Default
10 Checkout — Default	11 Order Confirmation — Default	12 Confirmation Email — Default

Happy path: Landing → discovery → order / size selection → cart → checkout → confirmation → email.

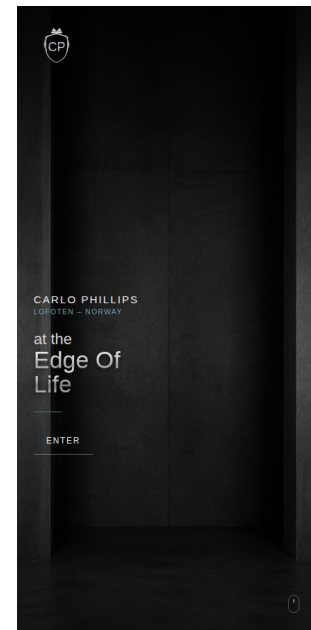

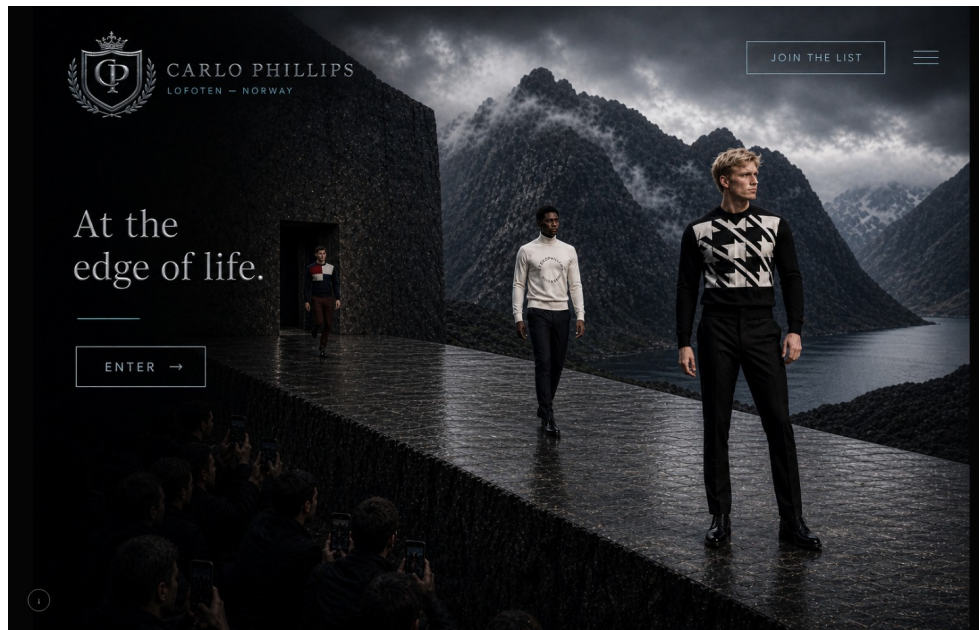

01 Landing — Pre-Morph

CTA MAP — ACTIONS IN THIS SCREEN

ENTER: Moves into the post-morph landing experience.

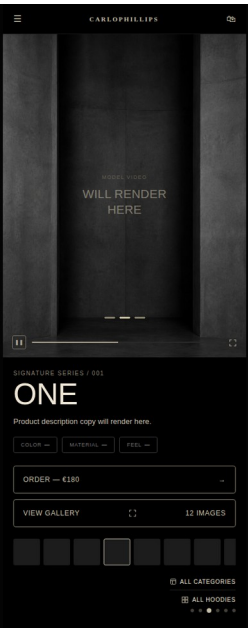

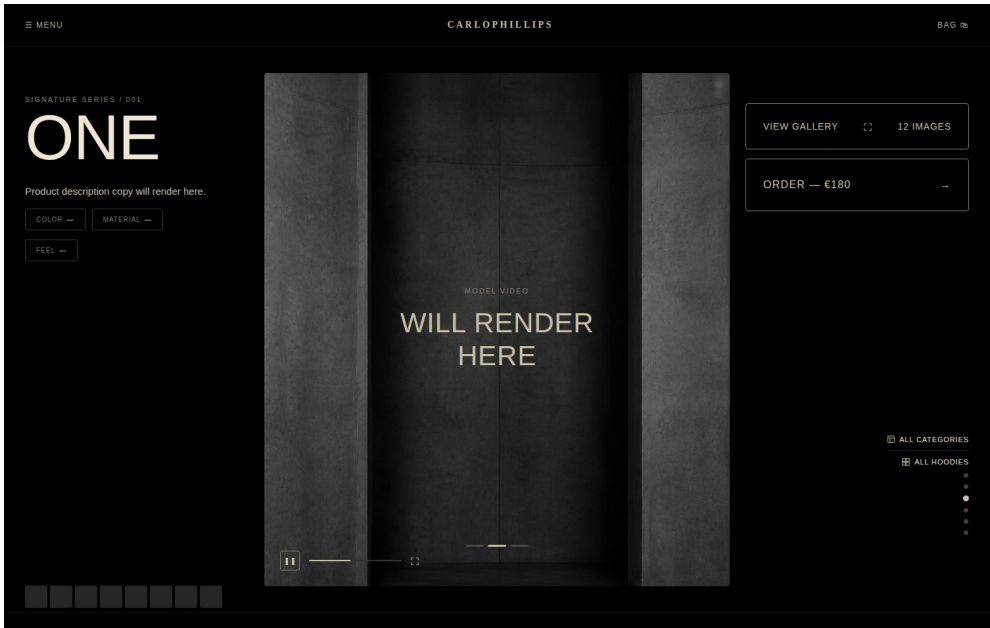

02 Landing — Post-Morph

CTA MAP — ACTIONS IN THIS SCREEN

JOIN THE LIST: Opens the email-capture interaction. • **MENU:** Opens catalog/information navigation. • **BAG:** Opens the cart.
ENTER: Continues into product discovery.

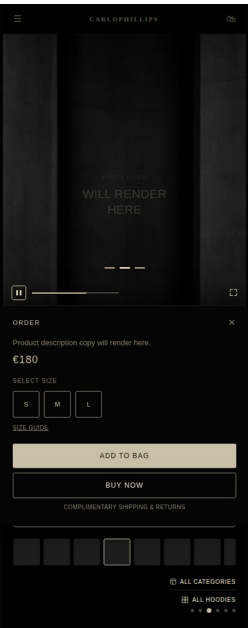

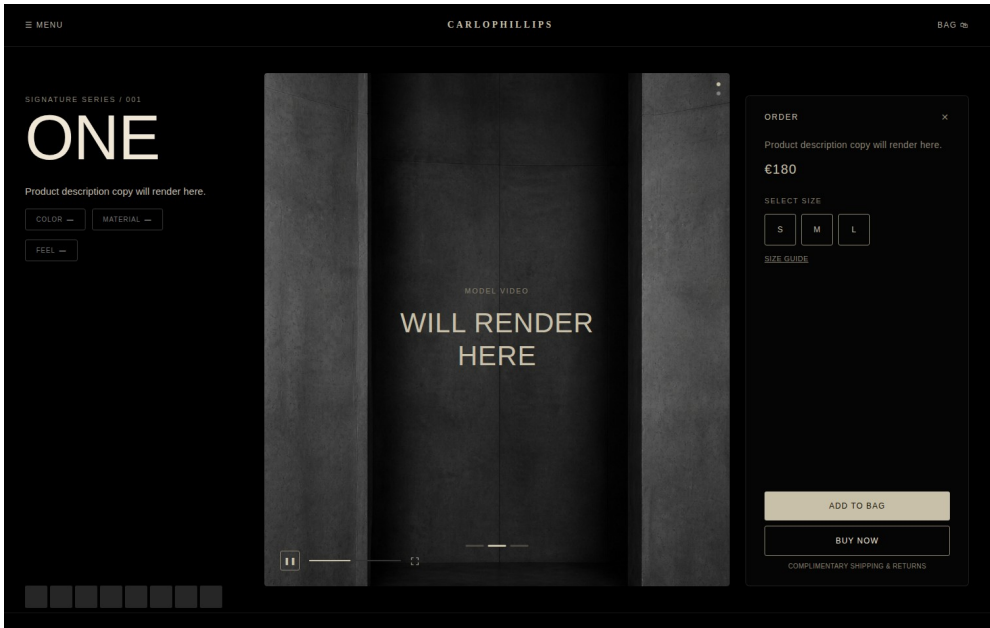

03 Discovery — Default [Video Stage]

CTA MAP — ACTIONS IN THIS SCREEN

- PAUSE / PLAY:** Controls the active product video. • **EXPAND:** Opens focused media. • **3 VIDEO DASHES:** Switches approved product videos.
- VIEW GALLERY:** Opens gallery overlay widget. • **ORDER:** Opens order widget. • **ALL CATEGORIES:** Opens category grid.
- ALL HOODIES:** Opens hoodie grid.

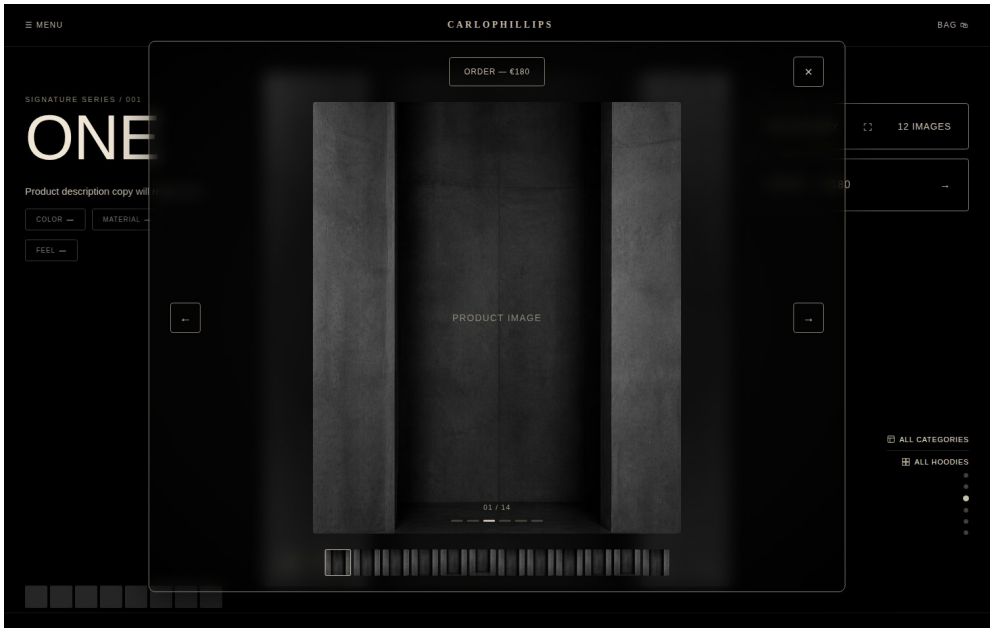

04 Discovery — Default, Order CTA Active

CTA MAP — ACTIONS IN THIS SCREEN

SIZE S / M / L: Selects product variant. • **SIZE GUIDE:** Opens sizing information. • **ADD TO BAG:** Adds selected variant and confirms bag state.
BUY NOW: Starts direct checkout. • **VIEW GALLERY:** Opens gallery overlay widget. • **ORDER CLOSE:** Closes order widget.

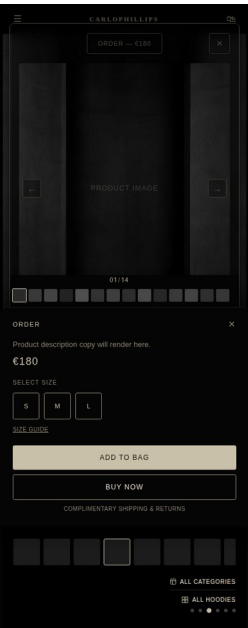

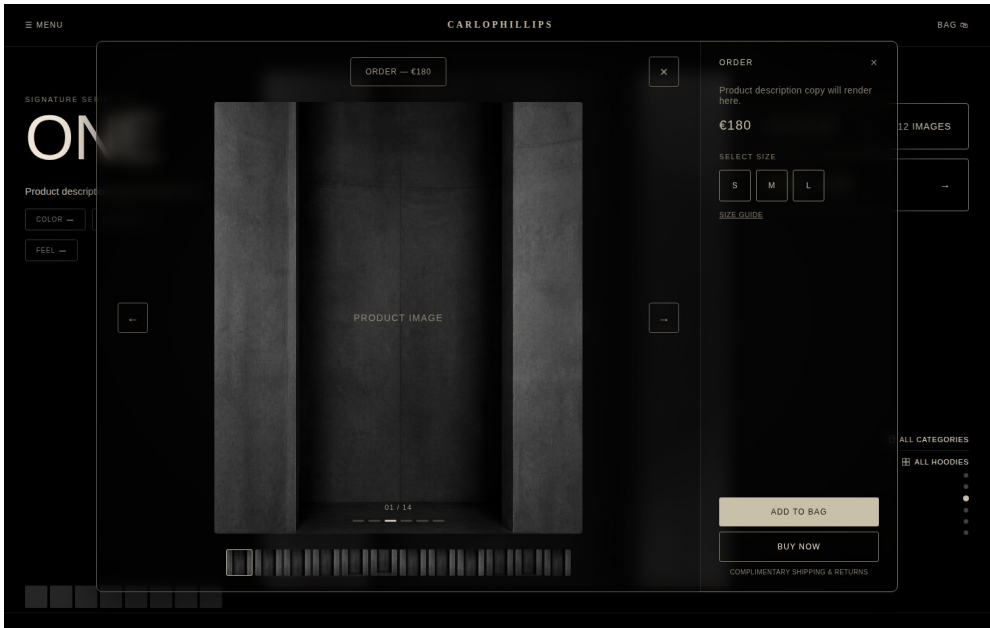

05 Discovery — Overlay Gallery

CTA MAP — ACTIONS IN THIS SCREEN

ORDER: Opens order widget. • **CLOSE:** Closes gallery overlay. • **PREVIOUS / NEXT:** Changes gallery image.
THUMBNAIL: Selects gallery image. • **01 / 14:** Displays active gallery position.

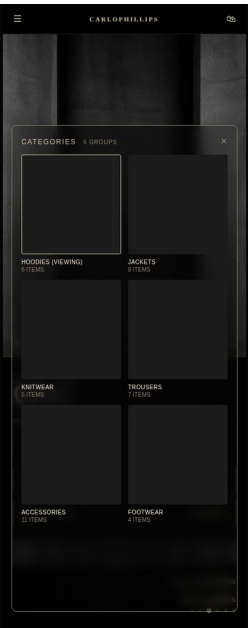

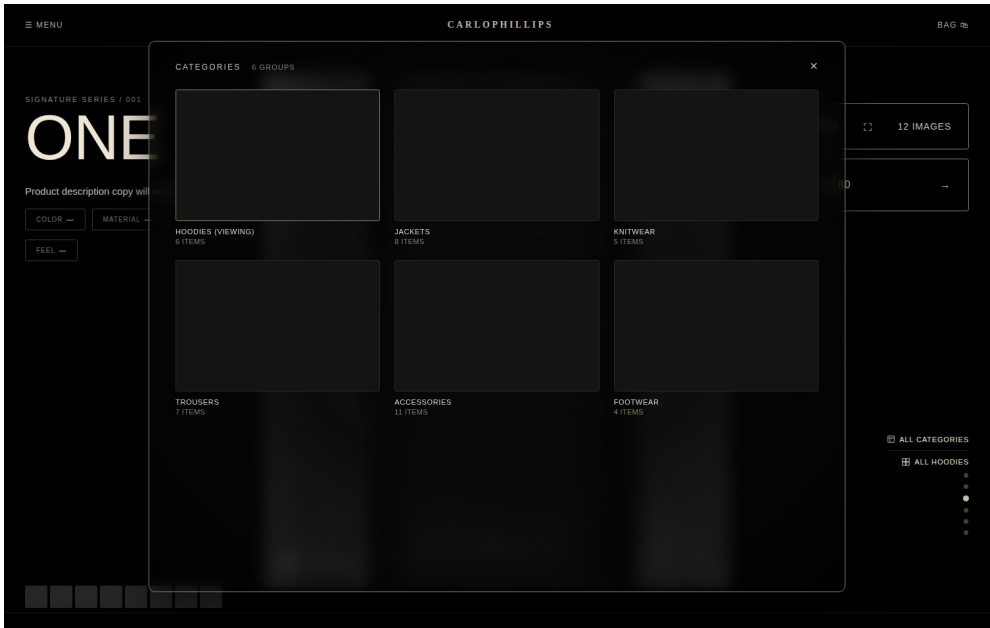

06 Discovery — Overlay Gallery, Order CTA Active

CTA MAP — ACTIONS IN THIS SCREEN

ORDER: Shows active order widget. • **CLOSE:** Closes order/gallery overlay. • **PREVIOUS / NEXT:** Changes gallery image.
THUMBNAIL: Selects gallery image. • **SIZE S / M / L:** Selects variant. • **ADD TO BAG:** Adds selected variant.
BUY NOW: Starts direct checkout.

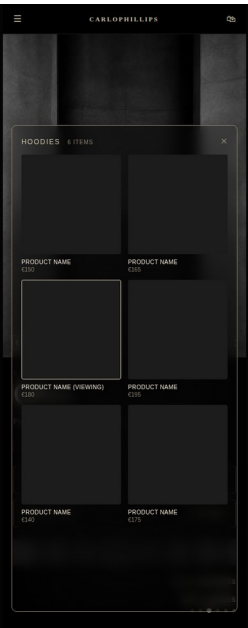

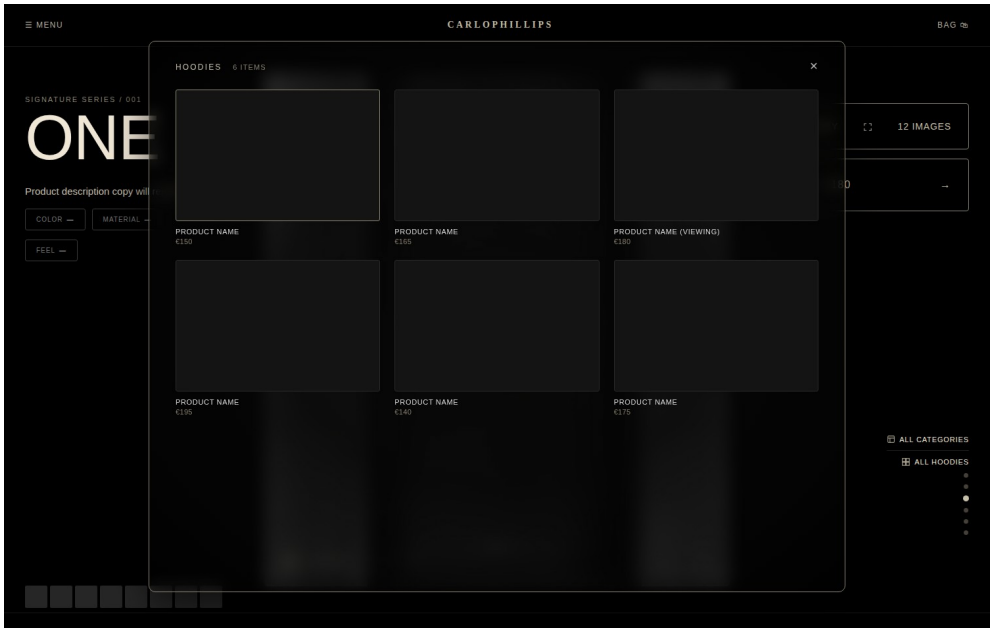

07 Discovery — All Categories Grid

CTA MAP — ACTIONS IN THIS SCREEN

CATEGORY CARD: Opens selected product category. • CLOSE: Closes category overlay. • ORDER: Opens order widget behind overlay when selected.

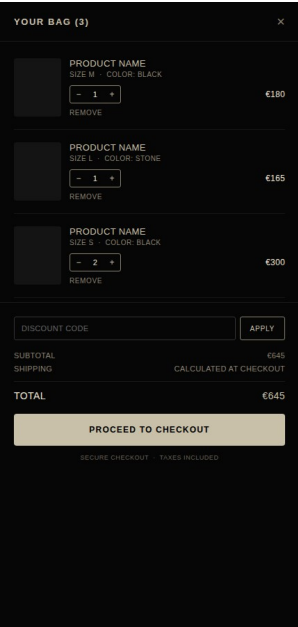

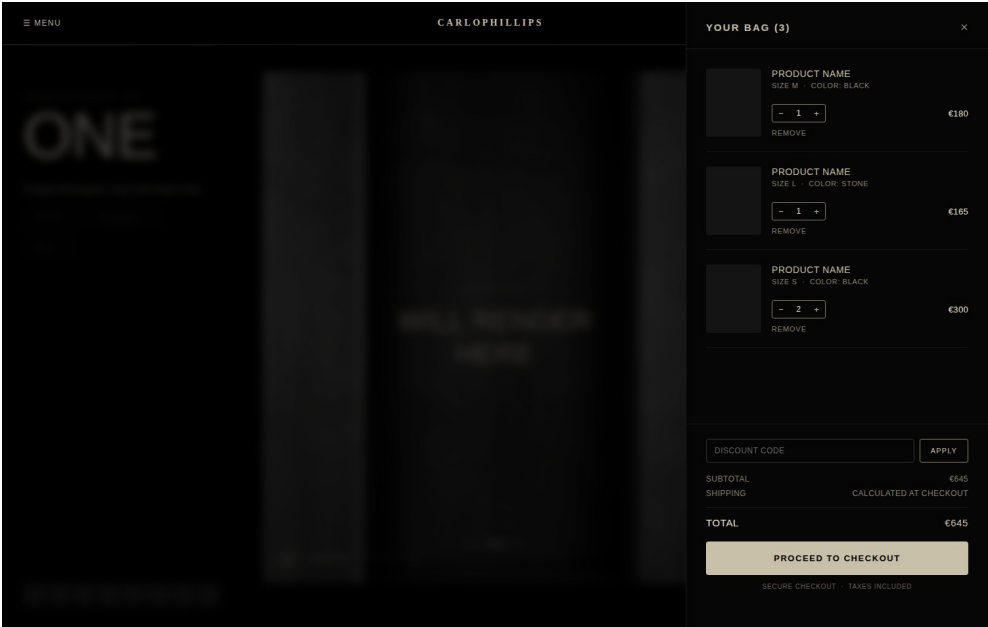

08 Discovery — Product Grid (All Hoodies)

CTA MAP — ACTIONS IN THIS SCREEN

PRODUCT CARD: Opens selected product discovery page. • **CLOSE:** Closes hoodie grid. • **ORDER:** Opens active product order widget.

09 Cart — Default

CTA MAP — ACTIONS IN THIS SCREEN

MINUS / PLUS: Changes line quantity within limits. • **REMOVE:** Removes cart line. • **APPLY:** Validates discount code.
PROCEED TO CHECKOUT: Moves cart into checkout. • **CLOSE:** Closes bag and restores product context.

10 Checkout — Default

CARLOPHILLIPS

V1.2 — Live Site Audit

*Design workbook (this document) compared against the live build,
with production screenshots — at carlophillips.com, captured 2026-09-13*

HOW TO READ THIS SECTION

Each entry re-uses the screen numbering from the workbook (e.g. “03/04”, “Appendix 21”).
DESIGN SPEC restates what this workbook called for. The panel on the right is an unedited
screenshot of the live production site, captured headlessly at 1280×800. NOTED CHANGE is the
specific, verifiable gap between the two.

V1.2

Index — Screens Audited Against the Live Build

01 / 02	Landing — Pre-Morph / Post-Morph
03 / 04	Discovery — Default [Video Stage] / Order CTA Active
07	Discovery — All Categories Grid
08	Discovery — Product Grid (All Hoodies)
09	Cart — Default
10	Checkout — Default
13	Contact Us — Support
16–18 / App. 28	Private List — Sign-Up, Confirmation, Validation, Already Signed Up
Appendix 21	Menu — Navigation
Appendix 22	Size Guide
Appendix 23	Added to Bag
Appendix 27	Order Tracking

NOT INDEPENDENTLY VERIFIED THIS PASS

Order Confirmation (11), Confirmation Email (12), Payment Could Not Be Completed (14), Checkout Expired (15), Discovery — Overlay Gallery states (05/06), and the out-of-stock / address-validation / shipping-recovery appendix widgets (pp.15–19, 30) all require a specific cart, inventory, or error state that could not be safely or reliably triggered on the live, publicly reachable store without placing a real order. They are not claimed to match or differ here.

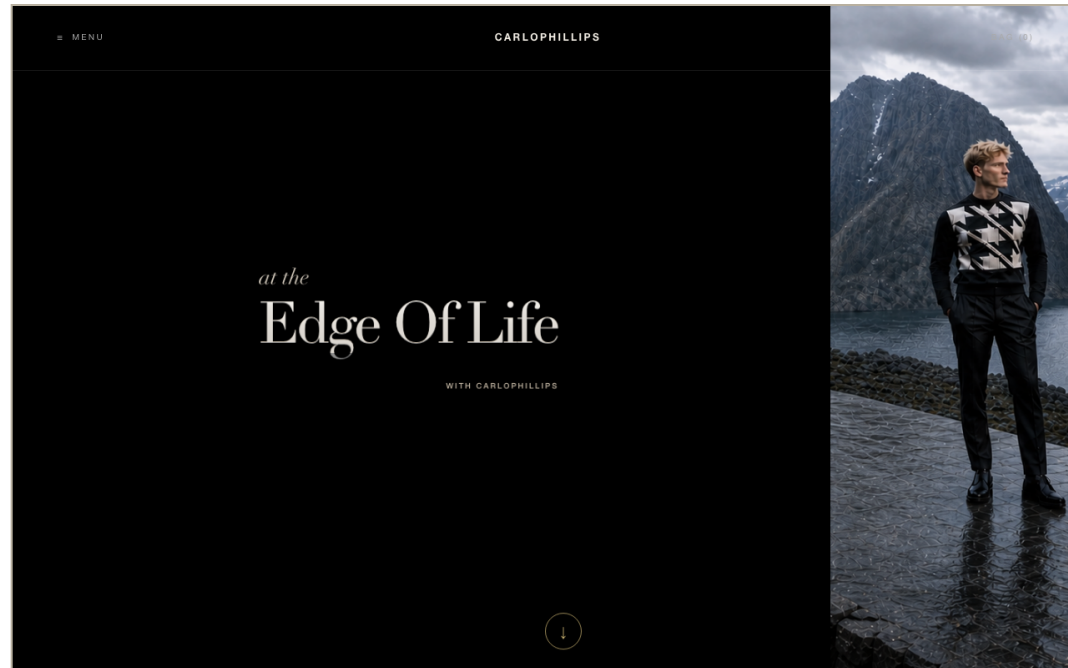

01 / 02 Landing — Pre-Morph / Post-Morph

DESIGN SPEC · WORKBOOK

Two distinct states: (01) a quiet pre-morph loading screen showing only a small “CP” crest monogram, the wordmark “CARLO PHILLIPS,” and “LOFOTEN — NORWAY,” with a top-right “JOIN THE LIST” link.

(02) Morphs into a full photographic hero (“At the edge of life.”) with an explicit “ENTER →” button.

LIVE — carlophillips.com (first paint)

NOTED CHANGE — V1.2

1. Pre-morph loading state (crest + wordmark) is not built; the post-morph hero is the first thing visitors see.
2. Brand mark is text-only (“CARLOPHILLIPS”) — no crest/monogram and no “LOFOTEN — NORWAY” tag.
3. No “JOIN THE LIST” header shortcut; email capture is only reachable via the full navigation menu.
4. “ENTER →” CTA is replaced by an unlabelled circular scroll arrow.

03 / 04

Discovery — Default [Video Stage] / Order CTA Active

DESIGN SPEC · WORKBOOK

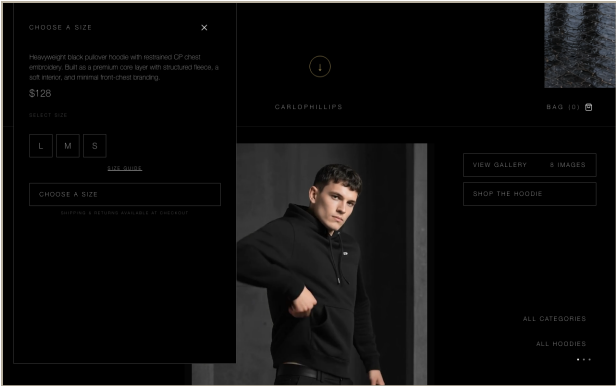

Order widget docks inside the right-hand sidebar with price in EUR, size S/M/L, and two CTAs: “ADD TO BAG” and “BUY NOW,” plus “COMPLIMENTARY SHIPPING & RETURNS.”

Media stage cycles three videos (Runway Motion → Fit & Silhouette → 360 Showcase); gallery holds 12 images.

LIVE — Default state

LIVE — Order CTA active

NOTED CHANGE — V1.2

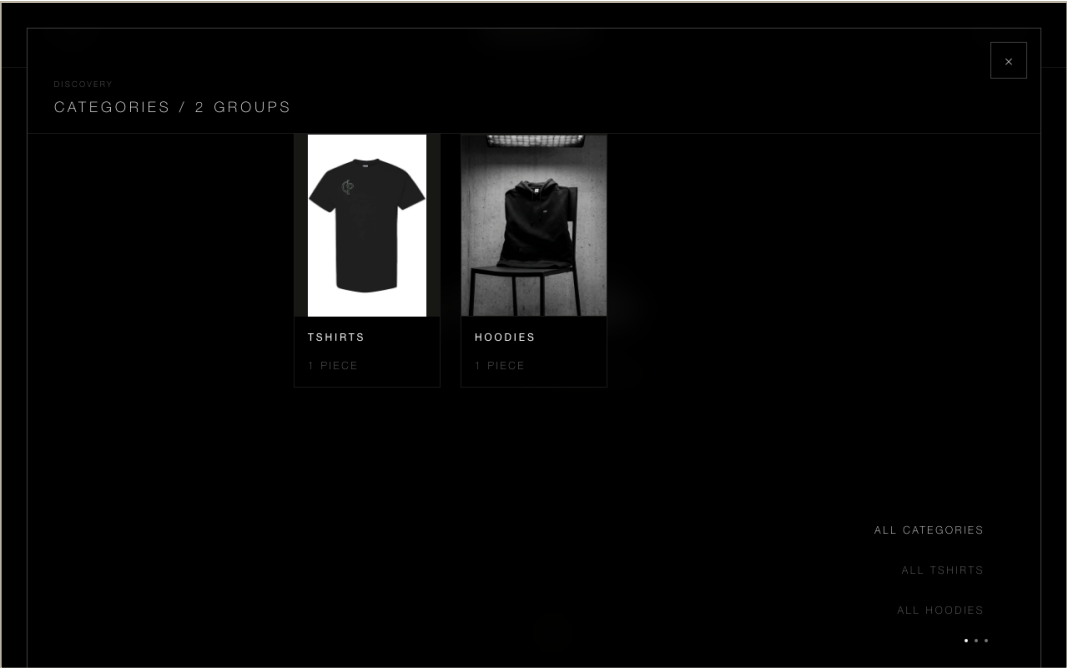

1. Order/size selector is a left-side full-height drawer instead of a docked sidebar widget next to the media.
2. No “BUY NOW” button — only “ADD TO BAG” / “CHOOSE A SIZE” is implemented.
3. Pricing is in USD, not EUR as specified throughout the workbook (€180 → \$128).
4. Third discovery video (“360 Showcase”) reports “unavailable” in the live player; gallery is 8 images vs. the spec'd 12.
5. “COMPLIMENTARY SHIPPING & RETURNS” copy was softened to “SHIPPING & RETURNS AVAILABLE AT CHECKOUT.”

07 Discovery — All Categories Grid

DESIGN SPEC · WORKBOOK

“CATEGORIES / 6 GROUPS”: Hoodies, Jackets, Knitwear, Trousers, Accessories, Footwear.

LIVE — carlophillips.com

NOTED CHANGE — V1.2

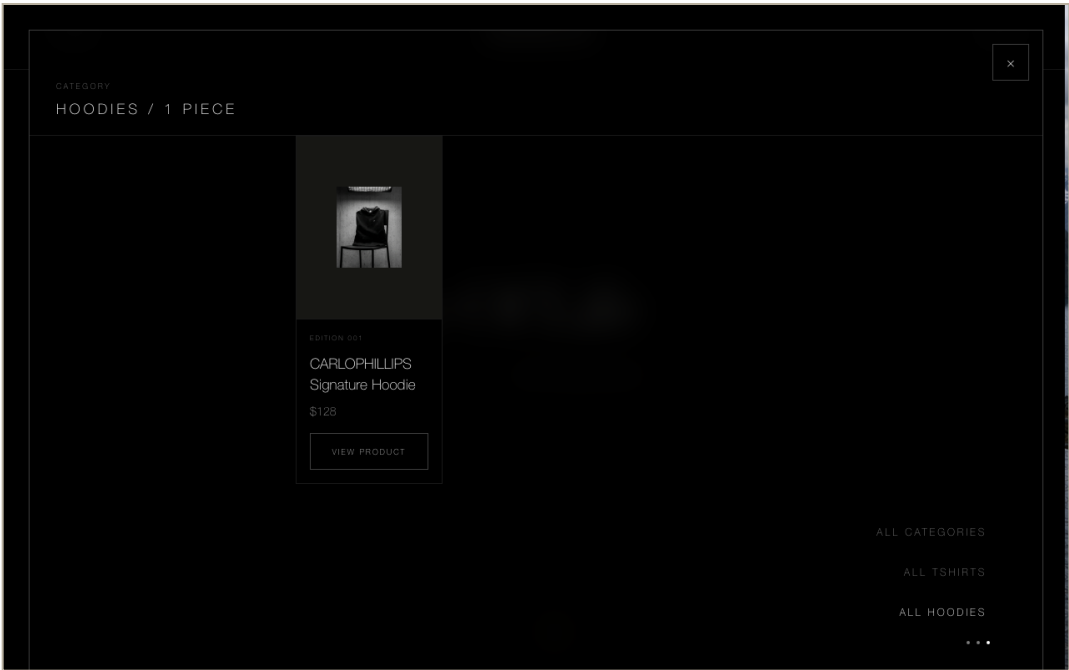

- 1. Catalogue breadth is 2 categories / 2 total SKUs live (Tshirts, Hoodies), versus 6 categories mocked.
- 2. Category tiles show an unspec'd “1 PIECE” count styling; no item-count breakdown per category beyond that.

08 Discovery — Product Grid (All Hoodies)

DESIGN SPEC · WORKBOOK

“HOODIES / 6 ITEMS” — a 2×3 grid of six distinct hoodie products, each with its own name and price.

LIVE — carlophillips.com

NOTED CHANGE — V1.2

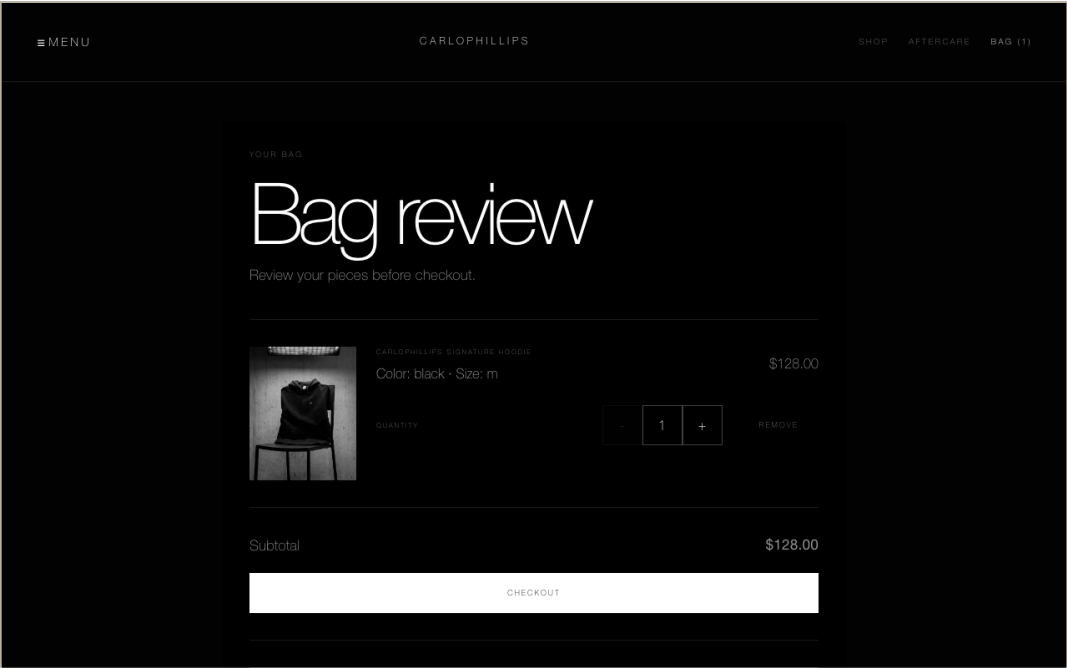

- 1. Only 1 of the 6 spec'd hoodie products currently exists in the live catalogue.
- 2. The single card carries an “EDITION 001” tag and “VIEW PRODUCT” button not called for in the spec.

09 Cart — Default

DESIGN SPEC · WORKBOOK

“YOUR BAG” renders as a right-side slide-over panel on top of the darkened Discovery page, with a discount-code field + “APPLY,” a Subtotal/Shipping/Total breakdown, “PROCEED TO CHECKOUT,” and “SECURE CHECKOUT · TAXES INCLUDED” copy.

LIVE — carlophillips.com/bag

NOTED CHANGE — V1.2

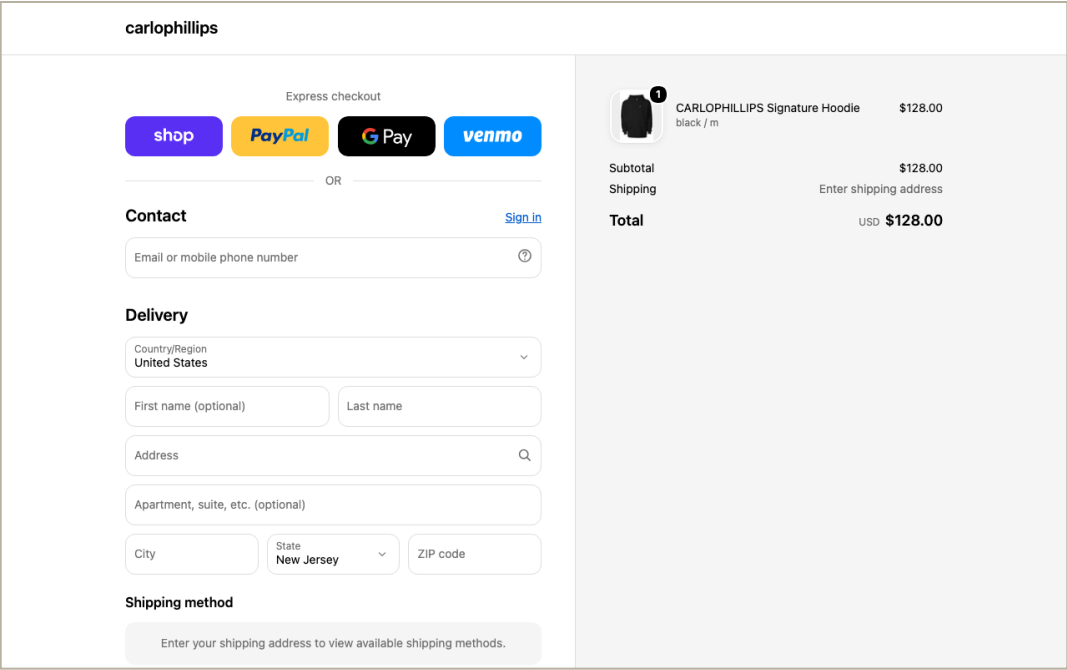

- 1. Cart is a dedicated full page (“Bag review”) instead of a slide-over drawer above the shopping context.
- 2. Discount-code entry is not present on the live cart.
- 3. “Secure checkout · taxes included” reassurance line is missing.
- 4. Primary button copy differs: “CHECKOUT” vs. the spec’s “PROCEED TO CHECKOUT.”

10 Checkout — Default

DESIGN SPEC · WORKBOOK

Fully custom, dark CARLOPHILLIPS-branded checkout with a 3-step progress indicator (Information → Shipping & Payment → Confirmation), an in-brand order summary, and explicit PCI/Shopify-hosted-field messaging.

LIVE — carlophillips.myshopify.com/checkout

NOTED CHANGE — V1.2

- 1. Checkout is not visually re-skinned to the CARLOPHILLIPS dark aesthetic — it is the default light Shopify template.
- 2. No custom 3-step progress indicator (Information / Shipping & Payment / Confirmation) is present.
- 3. Order summary is the generic Shopify layout, not the branded dark sidebar shown in the workbook.

Not completed past this point: no payment information was entered or submitted during this audit.

13 Contact Us — Support

DESIGN SPEC · WORKBOOK

Five fields — Name, Email, Order Number (optional), Subject (free text), Message — under an all-caps “CONTACT US” heading, with a “SUBMIT REQUEST” button.

LIVE — carlophillips.com

The screenshot shows the live contact form on the website. The header includes a menu icon, the brand name 'CARLOPHILLIPS', and links for 'SHOP', 'AFTERCARE', and a shopping bag icon. The form is titled 'SUPPORT' and 'Contact us'. It includes a subtext: 'Tell us what you need. We'll reply within 1–2 business days.' The form fields are: 'Email' (text input), 'How can we help?' (dropdown menu with 'Choose a topic' selected), and 'Message' (text area). A 'SEND REQUEST' button is at the bottom.

NOTED CHANGE — V1.2

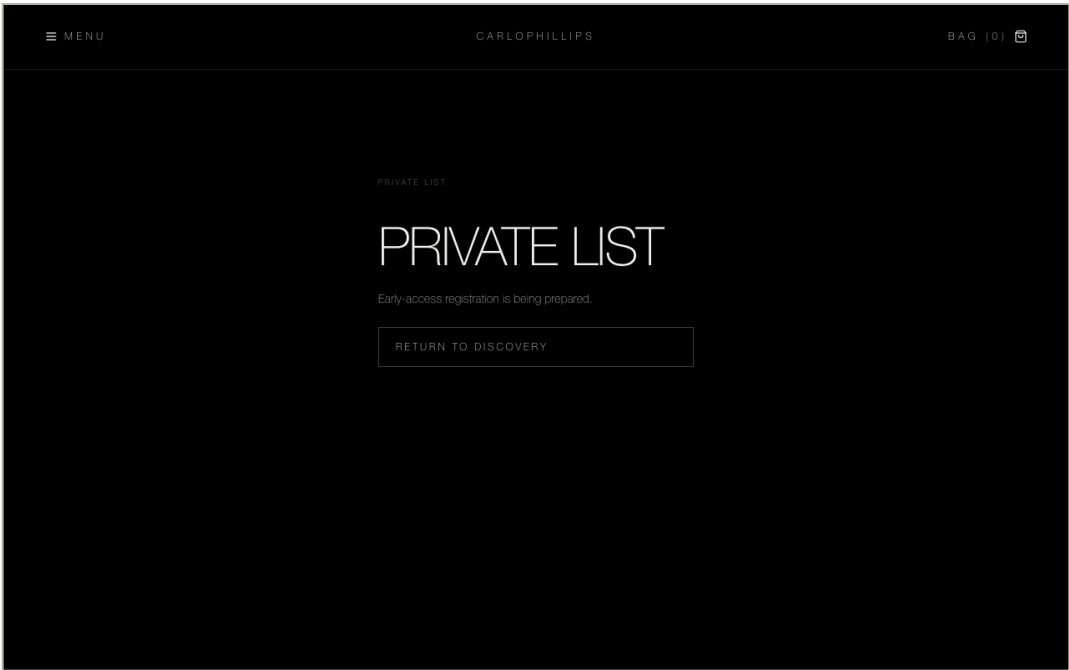

1. “Name” field is not present on the live form.
2. “Order Number (optional)” field is not present on the live form.
3. Free-text “Subject” is replaced by a “Choose a topic” dropdown (“How can we help?”).
4. Button copy differs: “SEND REQUEST” vs. the spec’s “SUBMIT REQUEST.”

16–18 / Appendix 28 **Private List — Sign-Up, Confirmation, Validation, Already Signed Up**

DESIGN SPEC · WORKBOOK

A working email-capture flow: “JOIN THE LIST” entry screen, inline validation, a confirmation state, and an “Already Signed Up” state for repeat emails.

LIVE — [carlophillips.com](#)

NOTED CHANGE — V1.2

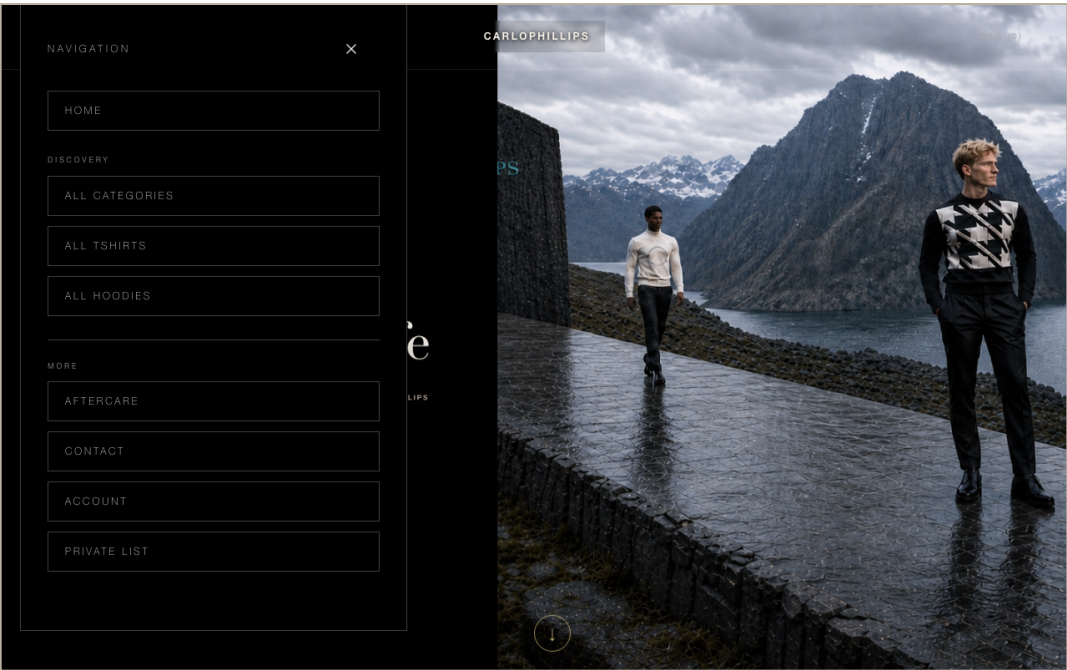

- 1. The entire Private List feature (sign-up, validation, confirmation, and “already signed up” states) is unbuilt and replaced by a “coming soon” placeholder — no email field is rendered at all.

Appendix 21 Menu — Navigation

DESIGN SPEC · WORKBOOK

A flat, unsectioned list: Navigation, Discovery, All Categories, All Hoodies, Contact Us, Private List.

LIVE — carlophillips.com

NOTED CHANGE — V1.2

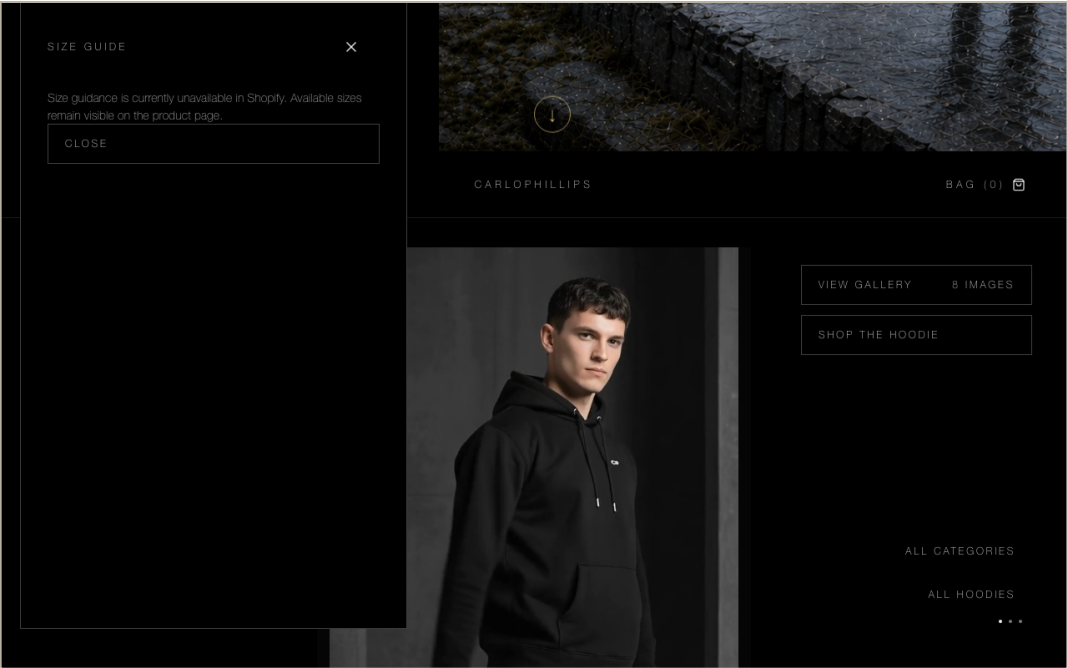

- 1. Four items not in the spec are present: “Home,” “All Tshirts,” “Aftercare,” and “Account.”
- 2. Navigation is grouped under “DISCOVERY” / “MORE” headings; the spec's flat single-column list is not used.
- 3. “Contact Us” is shortened to “Contact.”

Appendix 22 Size Guide

DESIGN SPEC · WORKBOOK

A measurement table — Size / Chest / Length for S, M, L — with a “Measurements are garment measurements” footnote and a “CLOSE” button.

LIVE — carlophillips.com

NOTED CHANGE — V1.2

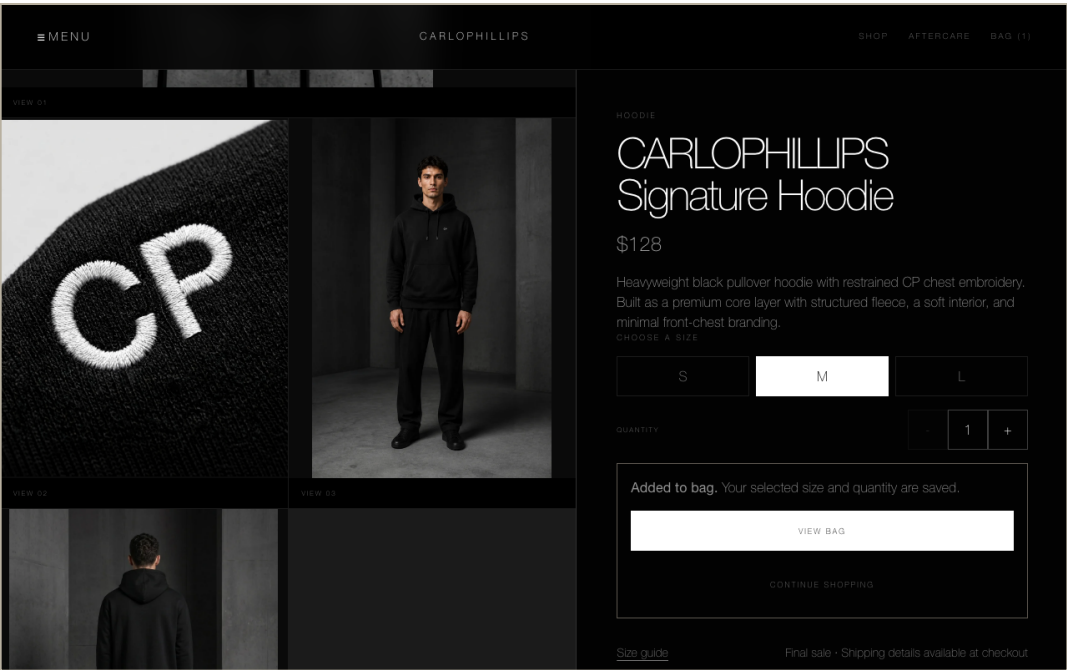

- 1. The size chart itself is not implemented — the live panel is a stub message (“Size guidance is currently unavailable in Shopify”) rather than the spec’d Size/Chest/Length table.

Appendix 23 Added to Bag

DESIGN SPEC · WORKBOOK

Confirmation toast names the product and variant directly: “ONE / Size M / EUR 180,” with “VIEW BAG” and “Continue shopping” actions.

LIVE — carlophillips.com

NOTED CHANGE — V1.2

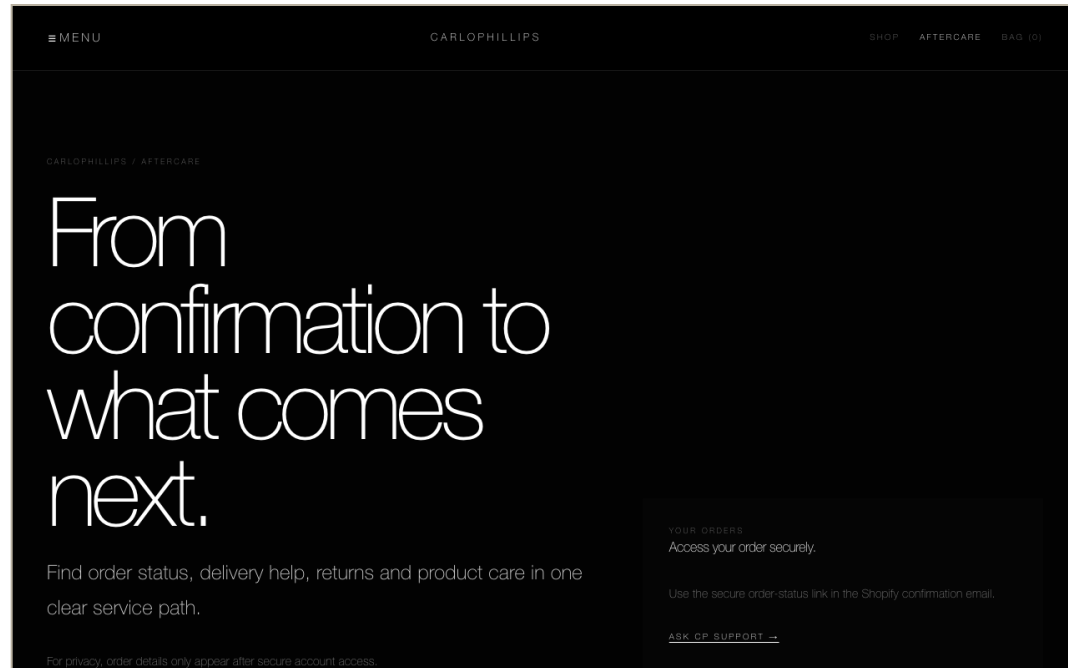

1. Confirmation copy no longer itemises the product name, size, and price inline — it reads generically (“Added to bag. Your selected size and quantity are saved.”) and relies on the page context instead.
2. Currency in the surrounding flow is USD, not the EUR shown in this workbook’s mock.

Appendix 27 Order Tracking

DESIGN SPEC · WORKBOOK

A dedicated “TRACK ORDER” screen showing order number “CP-0001” and a status timeline (Order Confirmed → In Production → ...).

LIVE — carlophillips.com (“Aftercare”)

NOTED CHANGE — V1.2

1. The custom in-brand order-tracking screen (order number + status timeline) is not built.
2. “Aftercare” states order details “only appear after secure account access” and points customers to “the secure order-status link in the Shopify confirmation email” instead.
3. The same page states self-service returns are “not configured” and routes returns to manual support.
